

WINDOWS SELECTION

vinyl | composite | wood | aluminum
residential and light commercial applications

VINYL

United Window and Door offers new construction and replacement windows with LowE and Argon, a heavy duty balance system, integral J-channel, warm-edge Intercept spacers and superior gasket allow for high energy performance and easy installation.

3900 SERIES SINGLE HUNG

For new construction and commercial projects, the 3900 series delivers outstanding performance at an affordable price.

4800 SERIES REPLACEMENT

Slim design lines provide a modern style with strength, security, and energy efficiency.

5500 SERIES NEW CONSTRUCTION

A host of options and customizable features make this an exceptional choice for new construction.

6000 SERIES NEW CONSTRUCTION

The 6000 Series combines a sleek frame, simple hardware and optional blinds between the glass for a strikingly modern appearance.

COMPOSITE

FORGENT® SERIES

This high-performance product line features proprietary material and thoughtful design, making it simple, convenient and easy to install. Short lead times for projects requiring windows quickly make the Forgent Series a perfect choice for new construction or replacement. Forgent Series windows are comprised of Glastra®, a proprietary hybrid of fiberglass and UV stable polymer, formulated for strength and resilience. Windows are engineered with Glastra on the exterior, and wood or Glastra on the interior.

LIBERTY SERIES

This all wood/cPVC window is designed for either a pocket insert, complete tear-out, or with a nailfin for new construction. The cPVC Freedom Frame mimics wood, but without the maintenance a wood frame requires. Custom options are available to meet historical requirements.

WOOD

HERITAGE SERIES

Heritage Series windows and doors are carefully crafted with a wood interior and exterior, making it possible to create architecturally intricate and historically accurate details. Available with K-Kron II exterior coating.

HISTORICAL REPRODUCTION

Kolbe windows and doors can help bring a historical building back to a state of beauty. Kolbe's products start with the finest materials and are crafted with the utmost attention to detail. If your project involves historical renovation, Kolbe can replicate the most intricate detail.

Kolbe's focus on craftsmanship and attention to detail means their products are ideal for historical replication projects. Products are designed to provide traditional design aesthetics, ease of operation and optimal energy efficiency. There are numerous options to further restore the beauty of your project, including custom wood species, historical casing, and numerous divided lite possibilities.

ALUMINUM

VISTALUXE COLLECTION

The VistaLuxe Collection was collaboratively developed with architects for designs that utilize clean lines and multiple units to create large expanses of glass. The extruded aluminum exterior provides low-maintenance durability, while the wood interior proves that minimalist design can feel warm and organic.

ULTRA SERIES

With extruded aluminum exterior and wood interior, the Ultra Series was designed for versatility and durability. It can mimic the traditional style of warm, wood interiors or meet more modern design needs.

LEGENDS SERIES REPLACEMENT

The Aluminum Clad Wood Double Hung from Trimline can be painted or stained. All wood parts are solid hardwood, not veneers or laminate. The insulating qualities of wood with the durability of weather-resistant aluminum clad exterior make Legends a great choice for replacement windows.
